

Nevron 5Star Hospitality Smart TV Solution ★★★★★

Highly interactive and intuitive Smart TV portal running on the cutting edge Nevron IPTV Platform and serving the most demanding IPTV projects. It is designed to establish a great relationship between a hotel and its guests, a ship and her passengers, or a hospital and its patients.

Compose Dashboard as you desire

Fully Customisable Dashboard

● Expose the right thing in the right time on the right place

Nevron Smart TV Dashboard is constructed to be fully customised for Customer needs. By size adjusted areas of Dashboard, any kind of entertainment service (e.g. TV, Radio, VOD, Music, Games), any kind of hotel product or service, different third party apps, Nevron services can be exposed, as can shops, room service, settings, etc., even direct products, services, or

adverts. All elements of Dashboard are linked directly with the chosen content, service, or app. It can be made more than just Home Dashboard, usually according to certain segments such as entertainment or hotel offerings. There are also available predefined Dashboard templates.

Nevron multi-Cross IPTV Platform

Nevron IPTV Platform is designed to cater for the needs of any kind of IPTV projects running on any kind of technology environment. All its SW components are developed in-house, from Encoders – Gateways, Transcoders, Middleware Backend to various kinds of Middleware Clients such as Smart TV Portal and STB Android as well as Linux Portal, Tablets or Mobiles.

Experience a new way of Partnership

- **Excellent Support**

Nevron provides excellent sales and technical support. Our Distributors, System Integrators, and Clients experience a new level of support than they are used to from today's IT suppliers. Nevron is different, while support is provided on a PERSONAL level. Our personnel will react fast and will stay with you until the subject or problem is resolved. Many times have our personnel resolved issues and provided consultations that are even not included in the price of the provided services. We get top level satisfaction and feedback from our Partners and Clients and we are very proud of that.

- **Adaptive Business Models**

While nearly all IPTV components are developed in-house, Nevron can be very adaptive with regards to pricing and business models. We are aware that each market has its own rules so the marketing and sales approach can be customised, and even prices can be adapted according to the competition on the market. Depending on the market our SW and services can be provided by OPEX, CAPEX, or some mix of these two sales models. Because of small line of decision makers, Nevron has the ability to react very fast regarding those kinds of decisions.

- **Designed for any Industry**

As Nevron IPTV Platform supports any Industry, Nevron Smart TV portal is designed to be adaptable for supporting industry staples such as hotels, ships, hospitals, and others. TV portal can be as such adjusted to suit any of these in order to expose their specific entertainment services, own services and products, third party apps, other features such as settings or mobile device connections and integrations with PMS or any other third party system.
