## SET-TOP BOX ACCESSORIES

A wide range of accessories to complement the Amino STB range at deployment, or for refurbishment and spares

**Amino offers a wide range of accessories that can be ordered as 'in-the-box' customer configurations, or as after-sales upgrades, spares or for refurbishment. These include:**

### REMOTE CONTROLS

The Amino STB range can be specified with either a simple or advanced remote control, the latter offering additional control of standard TV and DVD functions via a single remote. Exact R/C models may depend on the particular STB (see parts list overleaf).

### KEYBOARDS

An infra-red keyboard with integrated navigation pad and IR frequency selection. Exact models may depend on the particular STB (see parts list overleaf).

### INFRA-RED EXTENDERS

The infra-red receiver of the Amino hospitality STB range can be extended with an IR dongle for when the STB itself is mounted in a remote location, such as under the desk. A USB IR extender is also available for the standard STB range from Home-Electronics/Argento Systems ([www.home-electro.com](http://www.home-electro.com)).

### AV CABLES

Amino STBs are designed with flexible AV cable configuration options. All SD models and most HD models are equipped with a flexible 10-way analogue output. This allows the specification of various cable configurations to meet specific customer requirements, such as SCART, composite/S-VHS and Composite/ component (YPrPb). All HD models are equipped with an HDMI output allowing an HDMI cable to be specified.

### TVI CABLES

The Amino hospitality STB range can be connected via a special cable to certain models of hospitality TVs to simplify guest room solutions with a single remote control. The straight cable is for TVs enabled with IR pass-through. The 'Y' cable combines TVI with the IR extender dongle, for TVs without IR pass-through.

### DEBUG CABLE

For qualified service and maintenance personnel, or for partner development teams, a serial cable can be specified allowing direct debug and control of the STB from a PC. This cable comes with a header that can be soldered in to the STB PCB and requires that the STB is opened up.

### POWER SUPPLIES

Product and country specific power supplies and cables are available for the entire STB range.

### PRODUCT BASE

Most of the distinctive Amino STB range can be mounted either vertically or horizontally on a specially designed base.
