

Smart TV system for SMALL HOTELS

SPECIAL
OFFER

Get IPTV equipment, software, trainings,
know-how and support in a All-IN ONE package

ALL-IN-ONE Nevron
IPTV system includes:

- all required software,
- hardware,
- training,
- instalations,
- remote configuration,
- integration support and
- 1-year maintenance service

This ALL-IN-ONE hospitality TV solution is especially designed for small-sized hotels with up to 30, 20 or even ten rooms. All required Nevron TV technologies are assembled into one physical network server, equipped with fully functional components, the same that are used for large hotel TV projects.

Allow your SMALL Hotel to become BIG

Making IPTV system affordable to small IPTV projects allows SMALL-er hotels to become BIG. Smaller hotels usually don't provide many additional hotel services from which they could benefit some extra incomes. But with introduction of IPTV system they can provide guests with additional comfort and satisfaction, based on informative or entertainment services available on inroom TV screens. With usage of available and easy to use IPTV tools, smaller hotels can benefit even more with promotion of services, events and other touristic attractions in their neighbourhood, which again can result in even greater guest's satisfaction and raise of hotel and local business's income and wealth.
